**Battery Life:** Upto 6 hours or upto 300 measurements

**Standby Time:** Upto 6 hours

**Charging Time:** 3 hours

**Weight:** Approx 151g (without batteries)

**Dimensions:** 140mm x 93mm x 93mm

## Automatic, non-contact temperature screening

### Check temperatures quickly and easily

With temperature checking now becoming a normal part of life around the world, anyone entering your building can be checked for signs of fever instantly with this automatic wall (or optional stand) mounted non contact thermometer.

Instant temperature checks mean employers can improve health and safety for staff and customers. Simply stand in front of the T-210. Thanks to the in-built motion and infrared sensors, the T-210 will instantly measure your temperature. **Where prolonged use is expected, power the T-210 from the mains using the USB Type-C lead, provided.**

## MDD Approved dependability

### Clear, high accuracy readings

Unlike many similar devices, the T-210 is MDD Approved. This means dependable accuracy when measuring temperature - peace of mind for you. MDD Approved thermometers can also be used for medical purposes in a medical setting.

Temperature appears on the large, clear LED display; a green light displays if temperature is healthy; a red light and warning beeps if temperature is high enough to suggest fever.
